The company

Engineering and Realization of Industrial Projects

IRPI arises from the alliance of 3 companies involved and recognized since more than 10 years in several industrial projects and having additional skills in the technical studies, the structures calculation, and the conception of machines or special equipments:

ÂÂ

IRPI leans on a team of more than 30 technicians and engineers who master numerous skills and project managers in measure to lead global conception projects and realization in hand of industrial solutions and production process. The main skills grouped together within IRPI are:

- Advise and technical expertise
- Studies and conception CAO-DAO
- Structure calculation / RDM
- Industrial piping and boiler making
- Cryogenics
- Engineering process
- Mechanics and production process
- Automatism

Implanted in the heart of the region Rhà nes-Alpes, and close to numerous actors in the sectors of research, of the energy and of the industry, IRPI is able to take care with a high level of expertise of an industrial global project such as, for example :

- Setting-up of a new production or handling process

- Dévelopment of a cryogenics equipment
- Realization of a metallic work, such as the big wheel of London
- Conception of a wind turbine for the general public
